

The Defense Medical Readiness Training Institute is proud to bring the
**Homeland Security Medical Professionals Course
(HLSMPC)**

to

Seattle, WA

13 – 18 June, 2010

Do you know what to do if a catastrophic event happens?

- Identify key components that build the foundation for an effective medical response to an all-hazards incident
- Identify processes that ensure a comprehensive national medical response system is brought together
- Coordinate all necessary response assets quickly and effectively to an all-hazards incident

Talk to the Subject Matter Experts: Speakers include FEMA, FBI, USPHS, DHS, DHHS, US NORTHCOM, USDVA, private industry leaders and various military agencies, local and state government.

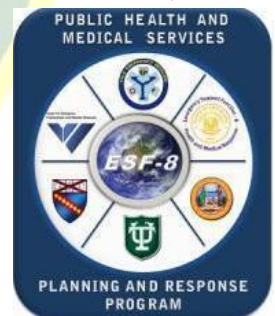

Gain knowledge & skills to use the National Response Framework and National Incident Management System to prepare, respond, and recover from an all-hazards incident.

Continuing Education: AMA PRA/CME Cat I; CNE; Cat II non- ACHE (30-40 credits)

**** Meets many of the Public Health Emergency Officer requirements*

Pre-Course Sessions (concurrent):

- *ESF-8 Disaster Planning*
***In partnership with **Yale and Tulane Universities**
- *ICS 402: ICS Overview for Executive/Senior Officials* and the *IS800b: National Response Framework*

Do I qualify? HLSMPC is open to DoD Active Duty/Reserve/Guard, US Public Health Service and US Coast Guard medical department officers and invited local, state, and federal healthcare professionals and emergency managers to include PHEOs (Public Health Emergency Officer).
